Subject: Federal Shutdown

In response to the shutdown of the federal government October 1, the Colorado Women, Infants and Children (WIC) office is carefully monitoring our funding situation - both administrative and food dollars - for the month of October and beyond. The good news is that we are in fairly good shape for the next two to three weeks.

Therefore, at this time Local WIC clinics will continue normal operations until further notice.

We will monitor the financial situation on a day-to-day basis to determine if it will be necessary to modify or reduce WIC services so that the Colorado WIC Program can meet its financial obligations.

Please be assured that as we learn more we will make the appropriate course corrections and keep you informed.
